Overview of National Hurricane Center/Tropical Analysis and Forecast Branch (TAFB) Marine Products and Services

WMO Region IV Hurricane Workshop
April 26th, 2021

Chris Landsea
Chris.Landsea@noaa.gov
Overview of National Hurricane Center/Tropical Analysis and Forecast Branch (TAFB) Marine Products and Services

To provide meteorological analysis, forecasts and warnings over the tropical and subtropical oceans for the protection of life and property
A Bad Cruise
Global High Seas Forecasts
- International Maritime Organization
NHC/TAFB - Areas of Responsibility
Typical areas for gale conditions

Note that the main areas for gales are near gaps and coastal terrain - this is not a coincidence!
Typical areas for tropical storms and hurricanes

- **June**
- **July**
- **August**
- **September**
- **October**
- **November**

HIGH SEAS AND OFFSHORES

Text Forecasts

HIGH SEAS FORECAST
NWS NATIONAL HURRICANE CENTER
1030 UTC FRI OCT 02 2015

SUPERSEDED BY NEXT ISSUANCE IN 6 HOURS

SEAS GIVEN AS SIGNIFICANT WAVE HEIGHT...WHICH IS THE AVERAGE HEIGHT OF THE HIGHEST 1/3 OF THE WAVES. INDIVIDUAL WAVES MAY BE MORE THAN TWICE THE SIGNIFICANT WAVE HEIGHT.

PAN PAN

ATLANTIC FROM 07N TO 31N W OF 35W INCLUDING CARIBBEAN SEA AND GULF OF MEXICO.

SYNOPSIS VALID 0600 UTC FRI OCT 02.
24 HOUR FORECAST VALID 0600 UTC SAT OCT 03.
48 HOUR FORECAST VALID 0600 UTC SUN OCT 04.

WARNINGS.

...HURRICANE WARNING...

HURRICANE JOAQUIN NEAR 23.3N 74.7W 935 MB AT 0900 UTC OCT 02 MOVING NW OR 315 DEG AT 3 KT. MAXIMUM SUSTAINED WINDS 115 KT GUSTS 140 KT. TROPICAL STORM FORCE WINDS WITHIN 160 NM W SEMICIRCLE...140 NM NE QUADRANT AND 180 NM SE QUADRANT. SEAS 12 FT OR GREATER WITHIN 400 NM NE QUADRANT...150 NM SE QUADRANT...120 NM SW QUADRANT...AND 300 NM NW QUADRANT WITH SEAS TO 39 FT. ELSEWHERE S OF 28N BETWEEN 70W AND 75W E WINDS 20 TO 25 KT SEAS 8 TO 10 FT. REMAINDER OF AREA N OF 21N BETWEEN 65W AND 78W AND OUTSIDE OF THE BAHAMAS WINDS 20 KT OR LESS. SEAS 8 TO 11 FT IN MIXED SWELL.
TAFB National Digital Forecast Database
Gridded Marine Forecasts

Spatial/Temporal resolution
- 10 KM
- 6 Hourly out to 144 hr (3 Hourly to 72 hr)

Parameters
- 10-M Wind/Gusts
- Significant Wave Height
- Hazards

How do I get weather forecasts over the open ocean?

**NOAA Weather Radio** - Reliable weather broadcasts out to 25nm from shore

**HF radio** - Long distance broadcast range with coastal and offshore weather information

**VHF radio** - Marine radio on channels 16 and 22A - Primarily broadcasts for coastal areas

**NAVTEX** - Medium Frequency weather broadcasts on 518 khz with a range up to 200 nm - Low cost and automated

**InMarsat C SafetyNET** - Satellite transmission of High Seas forecasts and warnings – Part of Global Marine Distress and Safety System

**Iridium SafetyCast** – Satellite transmission of High Seas forecasts and warnings - Part of Global Marine Distress and Safety System (Becoming operational now)

**FTPMail** - User can request and receive NWS text and graphic products via email using ftp commands - Low bandwidth email

TAFB High Seas

- High Seas Forecast is a text forecast issued primarily for large ocean going vessels.
- High Seas Forecast includes synopsis of primary weather features and a 48 hour forecast.
- High Seas Forecast primarily for strong winds (25 KT or greater) and/or seas 8 FT or higher.
- TAFB issues two text high seas forecasts four times a day.

https://www.nhc.noaa.gov/text/MIAHSFAT2.shtml
• OFF’s are designed for recreational/smaller fishing vessels up to giant cargo/cruise ships.

• Warnings are issued for conditions up to 48 hours from issuance time. A headline such as “Gale Conditions Possible” can be included for events beyond 48 hours.

• Tropical Storm and Hurricane Warnings normally based on 34kt/64kt wind radii given in the tropical cyclone advisory.

• Currently, Offshore Waters Forecasts extend out 5 days

• Winds less than 5 ft are described as “Variable Wind Less than 5 kt”

https://www.nhc.noaa.gov/marine/offshores.php
• OFF’s are designed for recreational/smaller fishing vessels up to giant cargo/cruise ships.

• Warnings are issued for conditions up to 48 hours from issuance time. A headline such as “Gale Conditions Possible” can be included for events beyond 48 hours.

• Tropical Storm and Hurricane Warnings normally based on 34kt/64kt wind radii given in the tropical cyclone advisory.

• Currently, Offshore Waters Forecasts extend out 5 days.

• Winds less than 5 ft are described as “Variable Wind Less than 5 kt”

NAVTEX is an internationally required broadcast of coastal urgent marine safety information to ships.

In the United States there are 12 U.S. Coast Guard transmitter locations. TAFB products are transmitted from Miami, San Juan, and New Orleans, and contribute to the Charleston broadcast.

https://www.nhc.noaa.gov/text/MIAOFFN04.shtml
High Frequency Voice Broadcasts (VOBRA)

The USCG broadcasts basic weather information prepared by the NWS (Ocean Prediction Center, National Hurricane Center and Honolulu Forecast Office) via high frequency voice broadcasts (VOBRA) to vessels operating in areas beyond the range of coastal NOAA Weather Radio. The VOBRA forecasts are prepared at a lower resolution than the offshore forecasts.

MARINE RADIOFAX

TAFB provides graphical products for three U.S. Coast Guard transmitters:

NEW ORLEANS (NMG)
POINT REYES (NMC)
HAWAII (KVM70)
Surface Prog Graphics

- Fronts, troughs, tropical cyclones, tropical waves, ridges
- 24, 48, and 72 hr Forecasts
- W. Atlantic, Caribbean, Gulf of Mexico, and E. Pacific
- Issued twice daily

2020 Impact-based Decision Support Services to U.S. Coast Guard Districts by Tropical Analysis and Forecast Branch (TAFB)/National Hurricane Center (NHC)

88 Hurricane Briefings

37 Spot Forecasts by NHC/TAFB for 2020 U.S. Coast Guard District Operations

"The Spot Forecast is a huge tool year-round for us during search-and-rescue. Likewise, I really want to thank all those responsible for creating the Coast Guard weather webpage, which is extremely valuable to us. It has so many of the products that we use on a daily basis, so I thank you and the entire team for that.”

USCG District 7 Commandant
RADM Eric Jones

D7/Miami:
Trop. Storm ARTHUR (3 briefings)
Trop. Storm CRISTOBAL (3 briefings)
Trop. Storm GONZALO (2 briefings)
Hurricane ISAIAS (12 briefings)
Trop. Storm JOSEPHINE (2 briefings)
Hurricane LAURA (9 briefings)
Hurricane DELTA (1 briefings)
Hurricane ETA (13 briefings)

D8/New Orleans:
Trop. Storm CRISTOBAL (6 briefings)
Hurricane HANNA (3 briefings)
Hurricane ISAIAS (2 briefings)
Hurricane LAURA (8 briefings)
Hurricane SALLY (7 briefings)
Trop. Storm BETA (5 briefings)
Hurricane DELTA (7 briefings)
Hurricane ZETA (5 briefings)

"You [NHC/TAFB] are a crucial and critical partner to us. On behalf of all of District 8 with 4,000 men and women that serve here in uniform, we are very, very grateful for the support you have given us. We consider you one of our key partners to ensure that the American public is served well across all of District 8. We’re very proud of the relationship that we enjoy with you all."

USCG District 8 Commandant
RADM John Nadeau
